— ABOUT US

Built for Businesses That Think Ahead.

We're not a vendor. We're your technology partner, embedded in your goals, fluent in your industry, and relentlessly focused on outcomes that move the needle.

"We believe every business, regardless of size, deserves technology that's enterprise-grade, beautifully designed, and actually works."

THE SCALYX TEAM

Outcome-Driven Approach

We don't measure success in lines of code or tickets closed. We measure it in revenue generated, costs reduced, and goals hit, exactly what you hired us for.

Specialist Teams, Every Project

From frontend engineers to cloud architects and ML specialists: you get the right people on every engagement, not generalists wearing too many hats.

No Black Boxes

Weekly demos, transparent roadmaps, and direct access to your team. You always know what's being built, why, and what comes next.

All Industries, All Scales

We've shipped for startups, SMEs, restaurants, gyms, healthcare providers, fintech platforms, and more. If your industry has a challenge, we have a solution.

WHAT WE DO

Full-Stack Services. Zero Compromise.

Every engagement is tailored to your exact requirements. We bring the right specialists, tools, and process, tailored to whatever your business needs to win.

01: FLAGSHIP

Custom Software Development

End-to-end product engineering, from discovery and design through to deployment and ongoing support. We build web apps, mobile apps, REST APIs, microservices, and enterprise platforms. On time. On budget. No surprises.

React / Next.js

Node.js

React Native

REST & GraphQL

Microservices

02

UI/UX Design

User-centred design that converts. Wireframes, prototypes, and pixel-perfect interfaces grounded in real user research.

Figma

Prototyping

Design Systems

03

Cloud & DevOps

AWS, GCP, and Azure migrations with full CI/CD automation, IaC, and zero-downtime deployments.

AWS / GCP / Azure

CI/CD

Terraform

04

AI & Data Engineering

ML pipelines, predictive models, LLM integrations, and real-time analytics dashboards that turn your raw data into a competitive edge.

ML Models

Data Pipelines

LLM Integration

05

Managed IT Support

24/7 proactive monitoring, rapid incident response, and helpdesk coverage so your team stays focused on the business.

24/7 Monitoring

Incident Response

SLA-backed

06

Digital Marketing & SEO

High-conversion funnels, SEO-optimised content, and performance campaigns built to drive real business growth, not just vanity metrics.

HOW WE WORK

A Proven Process That Keeps You in Control.

No black boxes. No bloated timelines. Just a structured, transparent delivery model designed to ship quality work fast.

DISCOVERY **We listen before we build**

Every project starts with a structured discovery to understand your users, your market, and your technical constraints. We don't write a single line of code until we know exactly what we're building and why.

DELIVERY **Agile sprints, real accountability**

Two-week sprint cycles with clear acceptance criteria. You see working software every fortnight, not just status updates. Changes stay cheap because you catch them early.

QUALITY **QA baked in, not bolted on**

Automated testing, code reviews, and performance benchmarking are part of every sprint, not a phase at the end. Our 98% on-time delivery rate is built on this discipline.

PARTNERSHIP **We don't disappear at launch**

After go-live, we transition smoothly into managed support: monitoring, incident response, feature iterations, and strategic reviews. Your success is our ongoing responsibility.

CLIENT RESULTS

Real Work. Measurable Results.

From high-converting websites to AI-powered platforms, our portfolio spans industries, scales, and challenges. Every project is measured against your actual business goals.

IMPACT BY NUMBERS

We've helped 50+ businesses ship faster, scale smarter, and grow confidently.

Across fitness, hospitality, healthcare, fintech, retail, and more, our work drives numbers that matter to your bottom line.
